Subject: RE: CAD cell monitoring posters

Bob, Deirdre and Paul - I'm all set on this end. I was able to save (but not open prior to saving) the files from the file exchange. Thanks for all your efforts to get these to me. My plan at this point is to have these printed in-house at EPA; but hold that thought until I get confirmation that this can happen in time for the 1/28 meeting.

Thanks again for your responsiveness...these should go a long way towards increasing public support for the LHCC.

Dave

	Subject	RE: CAD cell monitoring posters

Dave - The files were too big to send via email as PP files, so I saved them as *.PDF files - see attached. Perhaps Deirdre or I can copy the files on a CD and send it too you if you like? I believe Paul is out this week.

Pl. let me know if you received the *.PDF files and if you would like PP files on CD.

Tx,

Bob

Paul - any chance you could just send over the three power point slides? Having a little trouble with the file exchange. Thanks -
Dave

CAD cell monitoring posters

Dave:

I have uploaded 3 draft posters in PowerPoint format to our file exchange server. You should receive an automated e-mail shortly with instructions for downloading.

The first presents the velocity data, the second the methods, and the third the turbidity results for May 27. I have worked with our graphics department to put together the posters and they have been reviewed internally. Now we need your input. Please let me know if you think we have gone down the right path and send me your comments, markups, whatever.

I will be out next week but we will get them finished right after I get back.

Thanks and Merry Christmas,

Paul
